

/home/jetson/controlroom  
/Studio/Recorder/include  
/recording.h

```
graph TD; A["/home/jetson/controlroom  
/Studio/Recorder/include  
/recording.h"] --> B["string"]; A --> C["gst/gst.h"]; A --> D["iostream"];
```

The diagram illustrates a C++ header file's dependencies. A central box at the top represents the header file `/home/jetson/controlroom/Studio/Recorder/include/recording.h`. Three blue arrows point downwards from this box to three separate boxes below it, indicating that the header file includes these three files: `string`, `gst/gst.h`, and `iostream`.

string

gst/gst.h
